SIR:

In response to the Restriction Requirement dated Oct. 22, 2003, Applicant provisionally elects with traverse Group I, Claims 1-10 drawn to "a laser processing method...," for further examination on the merits. Applicant reserves the right to file one or more divisional applications directed to the non-elected inventions.

The Restriction Requirement asserts that the application contains claims to distinct inventions. However, MPEP § 803 states the following:

If the search and examination of an entire application can be made without serious burden, the Examiner must examine it on the merits, even though it includes claims to distinct or independent inventions.

Although the outstanding Official Action identifies different search classifications, it is believed that the claims of the present application would have to be searched in only a small handful of sub-classes. Furthermore, since electronic searching is commonly performed, a search may be made of a large number of, or theoretically all, subclasses without substantial

Reply to Official Action of October 22, 2003

additional effort. Accordingly, Applicants respectfully traverse the Restriction Requirement on the grounds that a search and examination of the entire application would not place a *serious* burden on the Examiner, whereas it would be a serious burden on Applicants to prosecute and maintain separate applications.

Therefore, it is respectfully requested that the requirement to elect a single group be withdrawn, and that a full examination on the merits of Claims 1-20 be conducted.

Respectfully submitted,
